

WEB-CARD

Concept of WebCard

Web card is a web based application, which will be helpful in online payment of various utilities bills through Internet. Currently supported features include

- Telephone Bills
- Electricity Bills
- Water Bills
- Mobile Bills

BACKGROUND

A silent revolution is sweeping across the globe. Paper money is gradually becoming obsolete. Nepal cannot stay exception with the concept. Web card is the revolutionary step towards this concept of transaction through the Internet. This would definitely help people out from making hectic schedules for utilities bill payment, shopping and many more. Our mission is to make people sit back in chair and do all the transactions from Internet using Web card.

User Id	User Name	User Type	Balance	Creator	Delete	Password
1	admin	A	0			
2	sanjil	A	0	admin		
3	raj	U	0	admin		

BENEFITS

- Saves valuable time of valued customers
- Faster means of payment, in a single click.
- No more staying in long lines.
- People no longer have to bother about their payment problems.
- Payments can be made wherever they are.

HOW IT WORKS ?

Every user is provided with a card as shown. Each card contains username and unique ID number through which a member can access his/her account. By using this number along with a secret password one can see their balance and payment status in no time.

TECHNOLOGY

Web card has been designed and developed by highly skilled and experienced professionals.

TOOLS:

Front end: PHP

Backend: MySQL

FUTURE ENHANCEMENT

We have plans to further extend the functionalities of Web card in the following areas:

- Payment of school and college fees.
- Money transfer.
- Payment of various Government taxes,etc.
- Customized World wide service.
